Special Installation Instructions

Authorization

Authorizing party agrees to allow Kayenta Technologies or an authorized sub-contractor to install internet services at the property.

- An antenna will be mounted to the exterior of the property on the roof or on a wall.
- Wiring will be connected from the antenna to the customer's computer equipment inside the property.
- Existing wiring may be used if possible, or it may be necessary to run new wire along the outside of the property and inside by drilling a new hole.
